

Coronavirus disease 2019 (COVID-19)

WHO Thailand Situation Report – 25 February 2020

Data as reported by the Thai Ministry of Public Health on 25 February 2020

HIGHLIGHTS

- Today, 25 February 2020, the Ministry of Public Health of Thailand announced two new cases of COVID-19, bringing the total number of cases in Thailand to 37. Both are Thai nationals, a female with a close relative who recently returned from a visit to China, and a male, working as a driver for foreign tourists.
- 422 persons are listed as Persons Under Investigation, including persons being tested for the coronavirus or being treated for respiratory symptoms. This includes persons under treatment for pneumonia who are no longer suspected of having COVID-19.
- The current definition of a Person Under Investigation (PUI) includes persons presenting with onset of fever and symptoms within 14 days of travel to Japan, Singapore, and South Korea as well as mainland China, Hong Kong SAR, Macau SAR and Taipei and environs.
- COVID-19 has been added to a list of dangerous infectious diseases giving the Government authority to respond quickly under the [Communicable Diseases Act B.E 2558 \(2015\)](#).
- WHO and the Ministry of Public Health chaired a meeting of international and local NGOs and health practitioners working with migrant populations within Thailand; participants discussed coverage of surveillance, issues around access to healthcare and the need to communicate the risks of COVID-19 in appropriate languages with migrant communities.
- WHO reiterates that [health screening and surveillance systems](#) in Thailand – at points of entry into the country as well as nationwide - are robust and capable of tracking suspected cases quickly, allowing health authorities to implement protocols to ensure isolation, contact tracing, testing and treatment of symptoms.

THAILAND SITUATION IN NUMBERS

total and new cases in last 24 hours

37 confirmed (2 new)
422 persons under Investigation / treatment

Nationality	Imported case	Locally transmitted cases	Total
Chinese	25	0	25
Thai	4	8	12
	29	8	37

As of 25 February 2020

RECOMMENDATIONS AND ADVICE FOR THE PUBLIC

The basic principles to reduce the general risk of transmission of acute respiratory infections, including by the virus causing COVID-19, include the following:

- Avoiding close contact with people suffering from acute respiratory infections.
- Frequent hand-washing, especially after direct contact with ill people or their environment.
- Avoiding unprotected contact with farm or wild animals.
- People with symptoms of acute respiratory infection should practice cough etiquette (maintain distance, cover coughs and sneezes with disposable tissues or clothing, and wash hands).
- Within healthcare facilities, enhance standard infection prevention and control practices in hospitals, especially in emergency departments.

WHO does not recommend any specific health measures for travellers. In case of symptoms suggestive of respiratory illness either during or after travel, travellers are encouraged to seek medical attention and share their travel history with their healthcare provider.

MEDIA

- WHO Thailand continues to receive media queries about the outbreak, and has revamped its [website](#) to provide relevant content on a regular basis to the public and other constituencies. Media queries can be directed to sethawebsite@who.int or kanpirom@who.int
- WHO Thailand's [Twitter](#) and [Facebook](#) accounts post useful information on hygiene and protection, such as when and how to use masks, as well as relevant WHO technical guidelines and other content related to the novel coronavirus situation in Thailand and globally.

WHO THAILAND STRATEGIC OBJECTIVES

WHO Thailand's strategic objectives to support Thailand's response are to:

- Limit human-to-human transmission including reducing secondary infections among close contacts and health care workers, preventing transmission amplification events, and preventing further spread within as well as to and from Thailandⁱ;
- Identify, isolate and care for patients early, including providing optimized care for infected patients;
- Address crucial unknowns regarding clinical severity, extent of transmission and infection, treatment options, and accelerate the development of diagnostics, therapeutics and vaccines;
- Communicate critical risk and event information to all communities and counter misinformation; and
- Minimize social and economic impact through multisectoral partnerships.

PREPAREDNESS AND RESPONSE

What Thailand is doing

- Thailand has strong capacities for case detection, risk assessment, case investigation, laboratory diagnosis, clinical management, infection prevention and control, and risk communication.
- Thailand also recently updated its dedicated national pandemic influenza preparedness plan (currently pending approval by the Prime Minister's Cabinet).
- With WHO support, the National Institute of Health of Thailand is supporting specimen testing for other countries as requested.
- The Health Ministry is conducting modelling exercises with the National Research Council of Thailand to forecast possible scenarios and outcomes as the outbreak evolves in Thailand.
- Visitors to Thailand who have recently been to affected areas are being provided information upon arrival by the Ministry of Public Health, including how to report any possible illness to the Department of Disease Control using the 1422 hotline.
- The Ministry has also introduced a self-reporting online tool, available in Thai, English and Chinese, which can be accessed [here](#).
- The Ministry has produced [recommendations](#) available in English for persons and organizations in response to COVID-19.

What WHO is doing in Thailand

- WHO Thailand remains in regular and direct contact with the Royal Thai Government through the Ministry of Public Health, sharing information with the Government including key developments elsewhere, as well as guidelines and updates;
- WHO supports the wider UN response and provides relevant information and advice to staff of the UN system in Thailand;
- WHO is collaborating with UNICEF on supporting the Ministry of Public Health and Ministry of Education in relation to special measures in schools and other educational institutions to safeguard against the spread of 2019-nCoV.
